## INNOVATIVE FEATURES

### POWER PROPEL SYSTEM

This system takes the work out of snowblowing. An innovative pivoting scraper keeps the rotor in constant contact with the pavement, making the job quicker and easier. (Select models only.)

### LOCKING ZIP DEFLECTOR

Throw snow high, low or in-between. The deflector locks in to any angle in less than a second—with just a touch of your hand. (Select models only.)

### QUICK SHOOT CONTROL SYSTEM

You can change the chute direction without even slowing down. Just squeeze the trigger and slide the handle-mounted grip to throw snow exactly where you want it. (Select models only.)

### POWER CURVE TECHNOLOGY

This technology, with curved rotor and inverted funnel housing moves more snow in less time and virtually eliminates clogging. Wide rubber paddles propel the snowthrower forward while cleaning down to the pavement.
